

SAUD ALRUBAYYI

Technical Operations • Project Delivery • Electronics • Broadcast Systems

PMP® Certified Engineering Professional

PROFESSIONAL PORTFOLIO

Selected projects, technical delivery, live operations, training initiatives, and engineering work.

8+	7	57%	11
Years Technical Experience	Technicians Led	Faster Hajj Studio Delivery	Studio Migrations Supported

Riyadh, Saudi Arabia | +966 505 200 533 | sa.alrubayyi@gmail.com

01 / OVERVIEW

Professional Profile

Engineering professional combining hands-on technical operations, project coordination, broadcast systems, applied electronics, and technical training. Experienced in mission-critical live environments where planning, system readiness, stakeholder coordination, and fast troubleshooting directly affect delivery.

PMP®	3 Days	2 Seasons	2024–Now
Project Management	Hajj Studio Delivery	Horse Racing Audio	Technical Training

What I Bring

- Technical project delivery from planning and readiness through execution and post-event review.
- Broadcast audio, AV/IP, fibre communication, RF and commentator/studio workflows.
- Applied electronics, industrial control, sensors, actuators and hands-on lab delivery.
- Cross-functional coordination with local and international technical stakeholders.

How I Work

- Structured planning with clear scope, resources, risks and contingency actions.
- Calm decision-making in time-critical live production and operational environments.
- Hands-on troubleshooting supported by documentation and readiness checks.
- Practical training that connects theory to working systems and real projects.

CAREER SNAPSHOT

2011–2015	Operations Coordinator & Database Administrator
2016–2024	Senior Studio Engineer & Technical Supervisor - SBA / SSC / TVPRO
2023–2026	Freelance Broadcast / Live Event Audio & Technical Operations
2024–Present	Electronics Technology Trainer - TVTC

02 / SELECTED PROJECT

Case Study: Hajj Studio Technical Delivery

A time-critical studio setup that demonstrates technical planning, resource coordination, team leadership, and delivery under compressed timelines.

7 Days	3 Days	4 Days	7
Original Schedule	Actual Delivery	Ahead of Plan	Technicians Coordinated

Challenge

- Deliver a complete studio technical setup within a fixed operational window.
- Coordinate audio, satellite/broadcast systems, team tasks and readiness activities.
- Protect operational continuity while managing dependencies and last-minute issues.

Approach

- Structured the work into clear priorities, dependencies and technician assignments.
- Used real-time coordination and fast issue escalation to prevent schedule slippage.
- Maintained backup and contingency readiness throughout the setup.

RESULT

Completed the technical setup in 3 days against a 7-day schedule - approximately 57% faster than planned - while maintaining broadcast readiness.

Hajj Studio / Control Room Photo

Recommended: wide photo showing the technical environment or team setup

03 / LIVE DELIVERY

Broadcast & Live Event Operations

Selected assignments delivered under high-pressure live production standards, with emphasis on audio quality, communication, redundancy, and operational continuity.

Six Kings Slam - Riyadh

Broadcast Audio Engineer | Gravity Media Arabia | 2025

5 production days • 12-hour shifts • international production environment

WTA Finals / Sky Sports UK

Broadcast Audio Engineer | Riyadh

Remote interpretation / voice workflow connected to UK broadcast operations via IP.

International Boxing Event

Voice-over / Live Sound Engineering

Integrated voice-over and live technical workflows under major event conditions.

Horse Racing - Two Seasons

Live Event Audio Engineer | JCSA / SSC / STEP

Live sound, RF communication, commentary integration, backup readiness and rapid troubleshooting.

RECENT SYSTEM EXPOSURE

Calrec Console	Hydra I/O	Wisycom RF	Riedel Intercom
Lawo mc²56	Studer Vista	AV / IP	Commentator Systems

Live Event / Broadcast Operations Photo

Recommended: console, commentary position, RF rack, OB/control room or venue operations

04 / ENGINEERING CAPABILITY

Technical Systems & Infrastructure

Hands-on experience spans signal flow, broadcast audio, intercom, fibre communication, AV/IP integration, operational readiness, maintenance, and backup systems.

Broadcast & Audio Systems

- Broadcast audio consoles and live signal routing.
- Commentary, studio and remote voice workflows.
- RF microphone / communication troubleshooting.
- Emergency audio paths and operational backup planning.
- Audio quality, gain structure, monitoring and fault isolation.

Infrastructure & Communications

- Riedel fibre-based communication integration.
- AV / IP workflows and remote connectivity.
- Intercom systems and technical team communications.
- Preventive maintenance and system readiness checks.
- Technical documentation, equipment tracking and escalation.

SELECTED INFRASTRUCTURE HIGHLIGHTS

- Supported post-COVID migration activity across 11 studios, helping receive and operate upgraded technical environments.
- Worked with transitions from legacy intercom environments toward Riedel-based communication workflows.
- Supported live production environments where system redundancy and zero-interruption readiness were operational priorities.

System / Rack / Signal Flow Photo

Recommended: Riedel, console, Hydra I/O, intercom, rack or infrastructure image

05 / TRAINING

Technical Training & Learning Development

Since 2024, I have applied engineering experience to vocational technical education, designing practical learning activities that connect electronics theory with real-world systems.

Training Delivery

- Industrial electronics, instrumentation and control systems.
- Sensors, actuators, PLC / HMI concepts and applied troubleshooting.
- Practical labs, learner projects and problem-solving activities.
- Targeted support for learners who need additional reinforcement.

Learning Development

- Model Lecture Initiative with structured objectives, content flow and practical exercises.
- Curriculum standardization and alignment across technical modules.
- Lab simulation using Multisim and Proteus.
- Professional workshops supporting communication and development.

SELECTED INITIATIVES

Model	Multisim	Proteus	DISC
Lecture Framework	Lab Simulation	Circuit Simulation	Workshop Facilitation

Training / Lab / Workshop Photo

Recommended: practical lab, electronics demonstration, project supervision or workshop

06 / ENGINEERING PROJECTS

Applied Electronics & Embedded Projects

Project work used to demonstrate practical electronics, embedded control, sensor integration, Linux-based interfaces, and hands-on prototyping.

Smart Irrigation & Environmental Monitoring

Arduino + Raspberry Pi / Linux + Python Tkinter

DHT11 temperature/humidity, soil moisture sensing, relay-controlled pump, hysteresis control, serial commands, Auto/Manual modes and live dashboard.

Smart Home Demonstration

Applied electronics / automation

Energy-conscious automation model used as an applied training showcase.

RF Multi-Device Control

Wireless control / electronics

Practical RF-based control project demonstrating device communication and applied circuit integration.

PCB & Prototyping Skills

Eagle PCB • SMD • THT

Hands-on PCB design and assembly experience, including SMD/THT soldering and practical electronics prototyping.

Embedded / PCB / Smart Irrigation Project Photo

Recommended: assembled prototype + dashboard screenshot + PCB/lab close-up

07 / DELIVERY FRAMEWORK

Project Management & Coordination

PMP®-certified with practical experience coordinating technical delivery in broadcast, events, training, infrastructure, and operational environments.

PMP®	Planning	Execution	Control
PMI Certified	Scope & Resources	Teams & Vendors	Risks & Issues

Project Delivery Activities

- Scope clarification and work planning.
- Resource allocation and technical readiness.
- Vendor / stakeholder coordination.
- Progress updates and issue escalation.
- Risk mitigation and contingency planning.
- Post-delivery review and continuous improvement.

Leadership in Practice

- Led and coordinated teams of up to 7 technicians.
- Balanced technical quality with fixed live-delivery deadlines.
- Worked with local and international stakeholders.
- Translated technical issues into clear operational actions.
- Supported teams through change, migrations and new workflows.
- Used documentation and readiness checks to reduce operational risk.

REPRESENTATIVE DELIVERY AREAS

Technical Projects	Live Events	Broadcast Ops	Training Programs
Infrastructure	Risk Mitigation	Vendor Coordination	Continuous Improvement

Project Coordination / Team Photo

Recommended: technical planning, team coordination, control room or project milestone image

08 / QUALIFICATIONS

Credentials & Contact

Professional credentials support a technical career built around engineering, delivery, leadership, and continuous development.

EDUCATION

BEng Tech - Industrial Electronics and Control

Technical College | Graduated 2018 | GPA 4.51 / 5.0 (Distinction)

CERTIFICATIONS & DEVELOPMENT

- PMP® - Project Management Professional | Project Management Institute (PMI), May 2026
- AI & Copilot Skilling | Digital Government Authority / Microsoft Cloud Academy, 2025
- Economic Feasibility Study | Colleges of Excellence, 2025
- Building Entrepreneurial Projects | Colleges of Excellence, 2025
- Change Management and Administrative Development | TVTC
- Managing Discussion Panels and Workshops | TVTC
- Leadership & Administrative Management | Professional Development
- Lawo mc²56 Console | Riedel Intercom System | Studer Vista Configuration
